SUMMARY

Artificial Intelligence student at Universidade Santa Cecília (Brazil), seeking a development and AI internship. I build AI agents and full-stack applications with Python and TypeScript, using AI-assisted development (Claude Code, Codex, Gemini) from prototype to deploy. Corporate experience with tickets and processes at the HR Shared Services Center of Coca-Cola FEMSA.

SKILLS

- **Programming:** Python, TypeScript, JavaScript, SQL.
- **Web:** HTML, CSS, React, Tailwind CSS, Node.js, FastAPI, Phaser 3.
- **AI:** Generative AI, LLMs, RAG, Vector Databases, Prompt Engineering, Gemini API, Claude Code, ChatGPT Codex.
- **Tools:** Git, GitHub, Vite, PostgreSQL, Supabase, Netlify, Render, ServiceNow, Microsoft Office, REST APIs.
- **Soft skills:** Communication, Proactivity, Problem solving, Teamwork, Organization, Adaptability.
- **Languages spoken:** Portuguese (native), English (intermediate).

PROJECTS

HR Agent for WhatsApp | TypeScript, Supabase, RAG, LLM | github.com/nathdomin/agente-rh-whatsapp

- AI agent that answers HR questions based on company documents (RAG on Postgres) and hands off to a person when it cannot find the answer. Scored 31 out of 31 questions in its evaluation.
- Sensitive topics never get an AI reply, and new answers only enter the knowledge base after human approval. Study project with a fictional company.

VivAI+ | Python, Gemini API, Generative AI | agenteia-vivaplus.onrender.com

- Agent that reads resumes in PDF or DOCX and matches the profile against open positions, ignoring sensitive data and evaluating skills only, with history stored in a cloud database.

MeetKof | React 19, TypeScript, Node.js, PostgreSQL | github.com/nathdomin/reserva-salas

- Meeting room booking system with a calendar, time conflicts blocked in the database and in the API, an admin panel, an audit log and tests with Vitest.

Sankofa: Paths of Resistance | TypeScript, Phaser 3, Vite | nathdomin.github.io/sankofa

- 2D browser game about the history of Black resistance in Brazil, with sprites, backgrounds and music generated in code and a custom tool that checks that every level can be completed.
